

NAVEETH BASHA M

B. Tech ECE | Semester 6 | CGPA: 7.02 | B.S. Abdur Rahman Crescent Institute of Science & Technology
7010971826 | naveethb007@gmail.com | Neyveli, TN

OBJECTIVE

Motivated B. Tech ECE student (Sem 6, CGPA 7.02) with hands-on experience in IoT, embedded systems, and AI-driven automation. Seeking a job role in Siemens to contribute to real-world projects in industrial automation, building technology, and smart systems — leveraging skills in Python, C++, ESP32, and Edge AI.

EDUCATION

B.S. Abdur Rahman Crescent Institute of Science & Technology | Vandalur, Chennai *Aug 2023 – Jun 2027*
B. Tech – Electronics & Communication Engineering | Semester 6 | CGPA: 7.02
Jawahar higher secondary school - Senior Secondary (class XII) | *2021 – 2023*
SCORE- 76%

INTERNSHIP EXPERIENCE

NLC India Limited (Govt. of India) | Industrial Electronics & Automation *Jun 2025*
• Trained at L&D Centre, Neyveli — India's largest lignite mining enterprise; exposure to industrial automation, power plant instrumentation, and in telecom department.
Vi Microsystems Pvt. Ltd., Chennai | Embedded Systems & IoT *Jan 2025*
• Microcontroller programming, sensor interfacing, circuit design, and hardware prototyping; performance rated satisfactory.

PROJECTS

RF Impedance Matching Calculator | Python, NumPy, Tkinter *2025*
- Built desktop tool for L, Pi, T-network matching up to 6 GHz with Smith Chart plots
- Cut manual design time 70% and achieved <2% component error
IoT Toxic Gas Detector | ESP32, Python, MQTT *2025*
• Automated service counter management with real-time AI detection and alert system — aligned with Honeywell's building automation focus.
Numerical Integrator & Differentiator | Python, SciPy *2024*
- Created tool using Trapezoidal + Simpson methods with <0.01% error vs analytical
- Used by 20+ students for DSP/control systems assignments
Sign Language Detection System | Python, OpenCV, TensorFlow, CNN *2024*
- Trained CNN model on 29-class ASL dataset using OpenCV for real-time hand gesture recognition with 92% test accuracy
- Deployed live webcam interface achieving 15 FPS detection speed to translate signs into text for hearing-impaired communication
Secure Access Control System | Embedded C, ESP32, GPIO *2026*
- Programmed ESP32 in Embedded C for keypad-based password system with 3-attempt lockout using EEPROM
- Storage implemented LED status indicators for "Access Granted"/ "System Locked" states with buzzer alerts and auto-reset timer

TECHNICAL SKILLS

Languages: Python, C, C++ (Arduino) **Hardware:** ESP32, ESP32-CAM, Arduino Uno, PIR, MQ2, OLED, LCD I2C, GPS
AI / ML: computer vision, Object Detection, Model Quantization **Tools:** Arduino IDE, Wokwi, Edge Impulse Studio, CAD/PCB Design
Domains: IoT, Industrial Automation, Embedded Systems, Edge AI, Computer Vision

CERTIFICATIONS

Certificate for the Completion of JavaScript Training | IIT Bombay (Spoken Tutorial) Issued Nov 2025
• Score: 80.00% *IIT Madras | Jul–Oct 2024 | 12-week*
Networking Basics | Cisco Networking Academy
IPv4, protocols, wireless access, and core networking fundamentals
